

JOB DESCRIPTION

SURVEY CREW CHIEF – Agoura Hills, CA

General Description

Chris Nelson & Associates, Inc. is currently seeking a Survey Crew Chief to join our team. The right candidate will have experience in all areas of land surveying with the ability to manage members of a field survey crew, as well as knowledge of all phases of development including design surveys, ALTA/NSPS surveys, topographic mapping, boundary establishment, tract maps, parcel maps, records of survey, legal descriptions and GPS control surveys. 5 years of Survey Crew Chief experience is preferred.

Required Qualifications

- ♦ Licensed as a Professional Land Surveyor in California.
- ♦ Ability to assign, prioritize, schedule and delegate work.
- ♦ Explain technical concepts to others and provide constructive feedback.
- ♦ Direct, train, and evaluate the performance of staff.
- ♦ Enforce safety procedures.
- ♦ Work independently.
- ♦ Analyze data, as well as read and interpret engineering plans.
- ♦ Collect, calculate and adjust mathematical computations such as distances, traverses and elevations.
- ♦ Operate and maintain complex precision surveying instruments, engineering calculators and personal computers.
- ♦ Effective oral and written communication skills.
- ♦ Establish and maintain cooperative working relationships with government staff, engineers, developers, contractors and the general public.

Example Duties

- ♦ Acts as leader for a field survey crew engaged in making plane and/or geodetic surveys for construction, topographic, right-of-way, and control survey projects.
- ♦ Participates in pre-survey planning meetings with project managers, resident engineers and contractor's representatives.
- ♦ Assigns and monitors workload and provides input for evaluation of members of field survey crew.
- ♦ Instructs and trains field survey crew in surveying and mapping methods, use of equipment and safety procedures.
- ♦ Gathers field survey data through use of conventional and Global Positioning System (GPS) methods.
- ♦ Sets up, adjusts, and operates surveying equipment, including electronic total station, data collector, and GPS equipment, in order to measure distances, elevations, and angles.
- ♦ Prepares field notes and drawings.
- ♦ Performs field surveys for roadways, bridges, and flood control projects, including installing surveying construction stakes, tying out existing intersection ties, locating or establishing vertical and horizontal control, right-of-ways, monuments, corners, boundaries, and property lines.

About Us

- ♦ Top tier civil engineering and land surveying company servicing all of Southern California.
- ♦ Culture that encourages a relaxed, yet professional work environment.
- ♦ Emphasis on employee mentorship, cross-training, and providing career advancement opportunities.

Compensation

- ♦ Competitive benefits including 401k, Dental, Vision, Health, Paid Holiday and Sick Leave.
- ♦ Salary compensation depending on experience and ability.
